The Association for Molecular Pathology (AMP) is pleased to invite representatives or patients to attend a VIRTUAL Lunch and Learn on:

**Non-invasive Prenatal Testing (NIPT): A Powerful (but Misunderstood) Screening Tool**

**Wednesday, February 2nd**

**12:00-1:30pm ET**

*In lieu of our usual in-person Lunch and Learn event, we invite you to don your best webcam apparel and join us for an intimate lunch-time discussion!*

A recent mainstream news article on noninvasive prenatal screening for rare genetic disorders has led to many questions and provides an opportunity for education and dialogue. This timely event will provide an introduction to Non-invasive Prenatal Testing (NIPT) screening, along with a detailed conversation regarding how the technology is currently deployed, how patients can benefit, and how screening tests differ from diagnostic tests. Significant time will be devoted to discussion among the participants - AMP and our diverse panel of experts welcome the opportunity to answer questions from the patient advocacy community and discuss any concerns and apprehensions from your organizations or the patients you represent.

**Moderator** - **Jill Murrell**, PhD, Director, Division of Genomic Diagnostics, The Children’s Hospital of Philadelphia, and Chair of the AMP Patient Engagement Subcommittee

**Panelists** - **Ellen Matloff**, MS, CGC, President and CEO, My Gene Counsel

**Robert Nussbaum**, MD, FACMG, CMO, Invitae

**Kathryn G. Schubert**, MPP, CAE, President and CEO, Society for Women's Health Research
